Fragrant HYACINTHS

The popular Dutch Hyacinths with their rich fragrance fill an important place in the early spring garden. As formal bedding plants they have few equals. They also provide desirable and striking color masses in the foreground of shrub borders as well as in the perennial garden—in fact, wherever an early spot of color is desired. Plant them informally in drifts and they will scent the spring garden as no other plant can do.

The following 12 varieties are the finest obtainable in their color classes. The size we are offering for outdoor planting is 15 to 16 cm., which is ideal for the average garden.

CROCUS

STERNBERGIA LUTEA

WILL BLOOM THIS FALL

This interesting and beautiful fall-blooming bulb resembles the Autumn Crocus but produces much larger blooms on sturdy, 6 to 8-inch stems. The flowers are rich, brilliant yellow. Unlike the Autumn Crocus and Colchicum, which it resembles in blooms, Sternbergia has the advantage of developing its graceful foliage shortly before it blooms, adding to the beauty of the richly textured flowers which come forth about the middle of September. Hardy and permanent in the garden. Plant the bulbs about 6 inches deep in a well-drained, sunny location. In the northern states give light protection over winter. Bulbs should be planted early, therefore send your order as soon as possible. 3 for \$1.00; 6 for \$1.75; 12 for \$3.00.

DAFFODIL MIXTURE

*For Show Purposes in Your Garden—
For Cut Flowers in Your Home*

A well-balanced mixture of top-notch Daffodils. Plant this mixture this fall and your garden will be the talk of the neighborhood next spring.

**12 for \$3.00; 25 for \$5.50; 50 for \$9.75;
100 for \$17.50**

Narcissus are among the earliest spring-flowering bulbs and as such are most welcome. Their gay yellow and white, and cream and orange blooms seem to be the very essence of the new season. It is well to plant them where they will have shrubs or evergreens as a background. Smaller kinds are very effective in the rock garden, and for a superb spring picture there is nothing to surpass a large planting of naturalized Narcissus.

These bulbs are very hardy and may be left in the ground undisturbed for several seasons. They need a well-drained location. Plant the bulbs 4 to 5 inches deep, as early as possible in the fall. Smaller and fewer

flowers after a few years indicate that the bulbs need to be dug up and replanted.

PLEASE NOTE: New classifications of Daffodils on page 15.

1C Ada Finch. One of the very earliest. Pure white, overlapping perianth; large, well-shaped trumpet with deeply flanged and rolled rim. The immense flower is carried on a tall, stiff stem. \$1.00 each; 3 for \$2.50; 6 for \$4.50.

RED MARLEY

DUKE OF WINDSOR

LOUISE DE COLIGNY

Louise de Coligny. In our estimation this is the most graceful variety ever offered. The reflexing habit of the perianth, which is pure white and of good substance, tends to throw the neat apricot-pink cup into focus. Shows its color immediately on opening, while some of the other pinks do so the second or third day. Another and very pleasant attraction is that it is strongly fragrant. \$1.25 each; 3 for \$3.25; 6 for \$5.50; 12 for \$10.00.

Pink Rim. Stiff, pure white perianth of good form. The cup is pale citron-yellow with a very distinct light picotee-pink rim. This variety draws attention wherever shown, for it is quite distinct from all others. Strong, tall stem. 75c each; 3 for \$2.00; 6 for \$3.50; 12 for \$6.50.

Siam. Well-formed, pure white perianth. The wide, flaring trumpet is apricot color, changing to soft pink. A giant among the pinks, it will be a leader as soon as it becomes better known. 75c each; 3 for \$2.00; 6 for \$3.50; 12 for \$6.00.

SIAM

The New PINK DAFFODILS

Delicate pastel tints—apricot to pink—will appear in various stages of development. Some are yellow when they first open, fading to different pink tones. Others show pink at first opening, getting deeper as the flower matures. You simply cannot help liking them. Plant a few in your garden this fall, and let their lovely blooms thrill you next spring.

PINK RIM

**PINK
GLORY**

Pink Glory. The "orchid" among Narcissi. Pure white perianth, somewhat loose but graceful, with an exquisite long trumpet opening light Indian yellow, soon shading to a lovely pink, inside deep pinkish apricot. When used in a small corsage with some asparagus green, this is as delicate as an orchid. \$1.00 each; 3 for \$2.50; 6 for \$4.50; 12 for \$8.50.

Rosy Sunrise. The queen of the new pink novelties. Pure white perianth of good substance, with a large, strongly fringed trumpet of pure salmon-apricot with distinct rose-pink shading. The inside of the trumpet turns to soft Indian yellow when fully developed. Free-flowering. \$1.25 each; 3 for \$3.25; 6 for \$5.50; 12 for \$10.00.

Peonies Are a Life-Time

Peonies are long-lived plants that do not require transplanting unless they show signs of deterioration. For that reason it is worth while to be particular about the place where they are to be planted. Choose a sunny location that gets good drainage. Dig deep, and use some well-rotted cow manure or a commercial fertilizer to enrich the soil. Bonemeal is also recommended.

Fall is the best time to plant Peonies. Plant so that the eyes are 1½ to 2 inches below the soil surface.

The varieties offered here are the very finest in their class; only the highest rated are offered. The plants offered are strong, 3 to 5-eye, healthy plants and should give excellent results.

SINGLE PEONIES

The Single Peonies are excellent in the garden. Their lighter flowers and stiff but graceful stems make them stand up better than Double Peonies. With their brilliant colors they are unsurpassed for the perennial border and in front of and among shrubbery. They are of easy culture and bloom about the same time as Double Peonies. Their average height is 2 to 3 feet.

FESTIVA MAXIMA

PEONY OFFICINALIS (Early or May-Blooming Peonies)

In this group belongs the early red Peony of our grandmother's garden. However, some outstanding new varieties have been developed and are offered here. This group will help greatly to extend the Peony season due to the fact that they come into bloom about two weeks earlier than others.

Alba Plena. True white. Double. \$2.00 each; 3 for \$5.25.

Rosea Plena. Bright rose. Double. \$1.50 each; 3 for \$4.00.

Rubra Plena. Rich dark red. Double. \$1.50 each; 3 for \$4.00.

Tree Peonies

This famous group is the shrub type. The stems do not die to the ground each year as the herbaceous Peonies do, and in the course of many years they will reach the height of 3 to 4 feet. Most varieties bloom in early spring—late April to the end of May, depending on the locality. They are of easy culture and grow anywhere other Peonies do. It is best, however, to plant them where they are sheltered from sweeping wind.

Prices quoted are for 2-year-old, 5-inch pot plants. Field-grown plants are available at 2½ times the prices quoted for potted plants.

We also have many additional varieties.

Archiduc Ludovico. Large; flesh-pink, turning to soft lilac. \$5.00 each.

Argosy. Single; pure yellow. \$10.50 each.

Athlete. Glazed mauve, shaded rose. \$5.50 each.

Flora. Pure transparent white, slightly blotched violet, carmine at throat. \$11.50 each.

Jules Pirlot. Satiny pink, flushed carmine. \$5.00 each.

La Lorraine. Large double flowers of a soft sulphur-yellow with a salmon tinge when opening. \$7.50 each.

Satin Rouge. Double; blood-orange. An altogether new color in Peonies. \$12.50 each.

Yaso-no-Mine. Semi-double; pure white. \$25.00 each.

FERN-LEAF PEONIES (Tenuifolia)

This distinct species comes into bloom very early and has graceful, very small fern-leaf foliage. It is entirely distinct from any other Peonies. Very brilliant and much admired by visitors in our garden.

Tenuifolia Rosea. Single pink. \$2.00 each; 3 for \$5.00.

Tenuifolia Plena. Double red. \$2.50 each; 3 for \$6.75.

JAPANESE IRIS

The Oriental Iris, with their huge picturesque blooms and graceful gladiolus-like foliage, are among the most beautiful of the great Iris family. Then too, they come into bloom at a time when other Iris are past, starting the latter part of June and continuing well into July. They are extremely showy in the garden and excellent as cut flowers for the home.

Oriental Iris are easily grown in any good average garden soil which is fairly rich and has good drainage. Divide the plants every three or four years, early in the spring or in September and October. Their average height is 2 to 3 feet.

DUTCH IRIS (Bulbous Iris)

Often called the "Poor Man's Orchid" because of their beautiful orchid-like blooms. They are easily grown in the garden, for they are hardy and come back year after year. They bloom during May and June and their average height is 18 to 24 inches. Bulbous Iris are much more effective when planted in groups; they prefer well-drained, sunny locations. Plant the bulbs 4 to 6 inches deep and 4 to 5 inches apart. Must be planted in the fall only.

PYRETHRUM, ROSE MIST

Pyrethrum, Rose Mist (Painted Daisy)

Rose-carmine petals with double-crested rose center which appears to have been dipped in stardust, giving it a silvery appearance. Sturdy grower and prolific bloomer. The 2-foot, stiff stems make it excellent as a cut flower. We are fortunate to have a few of these plants to offer this fall. However, the supply is limited and we can take care of early orders only, so send yours as soon as possible. 3 for \$2.25; 6 for \$4.00; 85c each.

Two New Giant Painted Daisies

Separate colors are also available at the same price, but not less than 25 of any one color.

Young Pansy plants should be set out in the fall in order to become well established for earliest spring bloom. After the ground is frozen protect them with pine branches, excelsior or other coarse material which will not become too packed or close-knit. Avoid materials that might rot. Mix a liberal amount of manure with your soil when planting.

Oriental Poppies

TO PLANT THIS FALL

Oriental Poppies, with their brilliant gigantic blooms, are among the very finest perennials for the garden, particularly now that soft pastel tints are available, ranging from the softest of pink to deep red and white. They are easily grown and once established will live for many years. The best time to plant them is September and October. Poppies should be planted deeper than the general run of perennials. Set the crowns approximately 2 inches below the level of the ground. Mulch the first winter after planting with excelsior, pine branches, or other material of similar nature. This mulch should not be applied until the ground is frozen, possibly November till December, depending on the locality. The plants offered here are strong, field-grown specimens and should bloom satisfactorily next year. *Order now.*
